Mamut Business Software Partners

**About Mamut:** Founded in 1994, Mamut (OSE "MAMUT") is a leading European provider of complete, integrated software solutions and internet services for SMEs. Mamut offers complete and user-friendly solutions at the best value for money integrating CRM, sales force, logistics, accounting, e-commerce, domains, e-mail, web hosting and security. More than 300,000 European customers simplify their daily business with solutions from Mamut. Further information about Mamut and the company's products can be found at [www.mamut.ie](http://www.mamut.ie)

Integrated with Mamut's award-winning  
business software

Mamut Point of Sale is a complete, user-friendly and advanced point of sale solution which seamlessly integrates with Mamut's financial solutions and is easily installed in your business.

Mamut Point of Sale is designed to carry out all the operations of an advanced cash register system in a user friendly way.

- 1 Efficient work processes**  
Make your work processes more efficient: with clearly understandable buttons and touch screens you can carry out customer transactions quickly and easily – from product registration to payment. You have access to up to date information directly from your financial system, for example stock levels and information on customers.
- 2 Sell more through personalised service**  
Because Mamut Point of Sale connects with Mamut's financial systems, you can view a customer's history while they are in the shop. See what they have bought previously, allowing you to recommend relevant products. Personalised follow up makes it easier to sell more to all of your customers, again and again.
- 3 Save time and money**  
Mamut Point of Sale saves you work. Cash register reconciliations are posted directly into your accounts, while sales are registered directly on the customer contact card in the financial system. All you need to do is to approve the report. Save time and money with automatic posting and at the same time have a better overview of your customers.
- 4 Run your shop more professionally**  
Give your shop a modern point of sale system with a free choice of equipment such as touchscreen, printers, customer display and bar code readers. Add in your company logo and chose the information you want displayed on your receipts, invoices and credit notes, giving your shop a consistent and professional image.
- 5 Increase revenue in your shop**  
With an extensive range of standard reports included, it's easy to have an up to date overview of your sales by time, customer, products, salesperson, and more. This information lets you provide better customer service, plan work hours for your staff and optimise your product range. All of which helps increase revenue for your shop!

#### Intuitive user interface

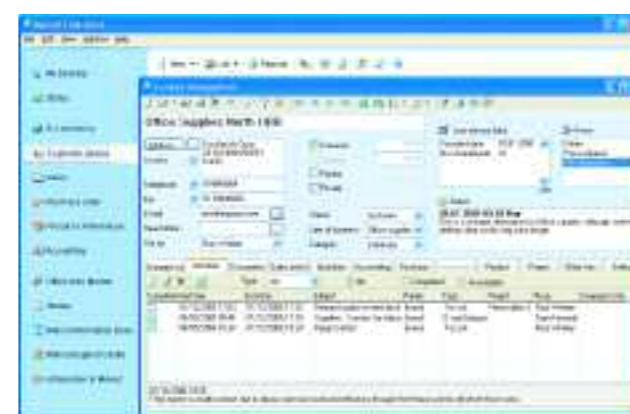

The system was developed based on feedback and input from users with experience of point of sale systems, and tested in shop environments. By eliminating unnecessary buttons and excessive work, the solution is easy to use for everyone.

Mamut Point of Sale is a standardised system with all the necessary functions, but also has a range of additional options so that the solution can be adapted to most industries. With one touch or mouse click, you can serve a customer, open the customer or product overview or work in the administration window. You can input products with short-cut keys or direct from the product register. Payment choices include cash, credit card, gift cards, invoices or a combination of the above. You can also add in discounts for customers and show the price with or without VAT.

#### Supports accounting requirements for sales

The system is set up to support accounting requirements in relation to sale of goods. For example, you can set reminders that you must register customers identification details on certain size cash transactions for money laundering regulations.

Receipt printouts can be customised and support all accounting requirements and sales documentation. You can chose which information is printed on the receipt, including date, company information, logo, name of sales person, payment method, product line, discounts and more.

Ideal for small businesses

wide range of reports which give you an up to the minute overview of information such as sales per user, date and time, cash transactions, unprocessed orders etc.

#### Easy cash register reconciliation and posting ledgers

Cash register reconciliation in Mamut Point of Sale is made simple with wizards. By using the wizard for end of day procedures you can run a cash reconciliation, update stock levels, post sales to the ledger, in the order/invoice module

#### Up to the minute view of customer and product information

Mamut Point of Sale is seamlessly integrated with Mamut's financial and management software. If you already run a Mamut solution with customer and product information, these details will be accessible in

Mamut Point of Sale. Synchronisation ensures you always have access to up to date information. You can check customer information, stock levels, cost price, weight and colour alternatives on these products. You can easily create invoices for people who are registered customers in your Mamut financial system. Additionally, the system includes a

and on the contact card in the financial system, and at the same time print out all the reports you require. And best of all, this is all done automatically, you simply need to approve the procedures. Mamut Point of Sale lets you save time and money.
